**STS<sup>®</sup>** DuPont™ and STS™ are trademarks of DuPont or its affiliates.  
 Varieties with the DuPont™ STS™ gene (STS) are tolerant to certain SU herbicide tolerant trait (sulfonylurea) herbicides. This technology allows post-emergent applications of DuPont™ Synchrony™ XP and DuPont™ Classic™ herbicides without crop injury or stress (see herbicide product labels).

NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use.
