

2025-26 USG Soybean Production Checklist

July 1st

Conditioning and bagging records. Send in all USG Seed Sample Reports for soybeans conditioned. Send in the form even if you did not sell any of the lot after cleaning.

July 31st

Soybean Replants due. Contact office for replant form if you have replants.

August 3rd

Soybean Grower Point of Sale (GPOS) Due

Dump records - For seed hauled out of the field in the fall of 2024 harvest that was not kept for seed, discard weight tickets will have to have the field harvested, bushels dumped, and variety listed.

Same for screenings and seed cleaned and not sold in 2025, or seed brought in to bins that were not cleaned and dumped.

August 5th

Production Acres, Units Planted, Field Names, and Locations (Preferably GPS outlined maps) sent to USG by Aug 5th.

Herbicide application reports will need to be submitted to USG by August 5th.

October 1st

Seed Inventory form. This form will be sent to you after GPOS reports are complete. This form will cover your production from planting in 2024 to final sales/dumps in 2025. It will have your seed from Parent Seed units planted/sold/dumped that we have on record in the USG Office. If there is anything missing or incorrect you will need to add or correct and send back to USG with the required document or forms.

December 31st

Soybean Harvest reports due December 31st.

All forms are available on the USG website on the dealer login page. Please contact the office for a login.
