

2022 USG Foundation/Parent Wheat Seed Order

It is time to place your order for 2022 fall USG wheat planting.

Each licensee who plants Parent seed of USG wheat will produce Green Tag QA commercial. Your State Crop Improvement office must inspect this production with a QA Program and/or seed inspection service. This commercial class of seed is also required to be marketed in USG bags.

USG 3118 will be inspected in the Blue-Tag Certified program due to USG 3118 being entered into the Certification program by the breeder. If you planted Foundation seed from VA Foundation Seed last fall you have Registered seed to sell and plant. If you planted Registered seed you have certified seed to sell. You will need new Registered or Foundation seed to plant this fall if you did not plant Foundation last year!

You can plant your own seed of QA varieties. Just indicate such on the attached order form by writing in OWN or placing a checkmark in the (Will Plant from Own Production) column. The USG Office will check your field inspection reports for eligibility. Write NEW if you would like new seed. You will be invoiced \$1 per unit on seed planted from your OWN production to have it in our quickbooks system.

Please return your seedstock order form by August 29, 2022.

New Parent Seed prices will be \$20.00 Untreated, \$22.50 Fungicide Treated, and \$25.00 Fungicide/Insecticide Treated. Seed price includes shipping. Seed will be allocated if demand exceeds supply & buyers will be notified in such case.
