STRENGTHS

- · USG's best mid 5 for the east coast
- · Stem Canker resistant
- · Will perform in marginal or variable soil types
- · Medium-tall that stands

AGRONOMIC TRAITS		
Pubescence	Gray	
Flower	Purple	
Hilum	Buff	
POD	Tan	
Growth Type	Narrow	
Growth Habit	Indeterminate	
Plant Height	Medium-Tall

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Enchology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience. In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist* products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications dyphosate, glublosinate and 2,4-D herbicides featuring Colex-D* technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist* crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunctive the Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and -fop herbicides. 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

Figlist £3' swheap seeds containing the Enlist* trait can only be used to plant a single commercial crop. It is unlawful to save and

Enlist E3' soybean seeds containing the Enlist' trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3' soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist' Soybean Product Use Guide. U.S. patents for Dow AgroSciences technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html

Corteva Agriscience is a member of Excellence Through Stewardship" (ETS). Corteva Agriscience products are commercialized in accordance with ETS product launch stewardship guidance and Dow AgroSciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory

and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

The transgenic soybeans event in Enlist E3" soybeans is jointly developed and owned by Corteva Agriscience and M.S.

Through Stewardship is a registered trademark of Excellence Through Stewardship.

Enlist Duo" and Enlist One "bericides are not registered for sale or use in all states or counties. Contact your state pesticide regulatory agency to determine if a product is registered for sale or use in your area. Enlist Duo and Enlist One are the only 2,4-D products authorized for use with Enlist crops.

"DuPont™ and STS" are trademarks of DuPont or its affiliates.

Varieties with the DuPont™ STS® gene (STS) are tolerant to certain SU (sulfonylurea) herbicides. This STS berbicide tolerant trait without crop injury or stress (see herbicide product labels). NOTE: A soybean variety with a herbicide tolerant trait without crop injury or stress (see herbicide product labels). NOTE: A soybean variety with a herbicide tolerant trait does not confer tolerance to all herbicides!. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions and precautions for use.
